About Me

I am a programmer with experience since the age of 13, developing skills in logic and problem solving. Over time, I have specialized in cybersecurity and data science AI, in addition to deepening my knowledge in various areas of programming, such as software development, artificial intelligence, and creating tools for system security.

Education

Certifications

Udemy

- University Web Development - FrontEnd Web Developer!
- C Sharp Programming
- SQL and NoSQL Databases

CIP Cyber

- Master in Cyber Security - Power Bundle

Alura Latam

- AI: Exploring the Potential of Generative Artificial Intelligence
- Prompt Engineering: Creating Effective Prompts for Generative AI

Experience

Information Security Analyst

2022

Korsaka ↗

- Analyzed vulnerabilities in the Korsaka (gaming) website, identifying password flaws and SQL injections, and proposed measures to improve site security.

Projects

Nextcloud

github.com/Devsebastian44/Nextcloud ↗

- Developed a Bash script that automates the secure installation and configuration of Nextcloud, managing dependencies, databases, and security settings for efficient deployment.

Sandboxed

github.com/Devsebastian44/Sandboxed ↗

- Designed "Sandboxed", an isolated testing environment for safe malware analysis on Windows and Linux systems, integrating static and dynamic analysis tools.
- Tools used: Python, Bash Scripting

Skills

Languages: C#, Java, JavaScript, TypeScript, PHP, Python, SQL

Frameworks and Libraries: Angular, Bootstrap, jQuery, Laravel, Node.js, React, TailwindCSS

Databases: MySQL, MongoDB, PostgreSQL

Tools and Technologies: Bash, Docker, Git, Figma
